Hi Sarah,

Can you call me regarding the 2 options. I have pathways that I would like to explain and get your feedback on. We will have the label ready shortly after that.

Best Regards,

Amy McCaskill (she/her)

Hi, Amy. If creating another website is not feasible at this time, Emily noted in the file that you could revise the order of the statements, so the user reads that there may be state restrictions first before they get a sense that the restrictions may only be regarding tank mixes. This is what we were thinking: Users must comply with additional requirements including state restrictions found on www.TaviumTankMix.com. The user must check www.TaviumTankMix.com no more than 7 days before application of this product for additional labeling.

I hope this helps!

Sarah

I realized the issue with my idea that the link isn't electronic. So I am reaching out to our communications team to see how quickly we can change the name or what the technical options may be. I fear that getting a new name may not be as quick as you want to finish this action. I'll be in touch as soon as I can in the morning.

Thanks Sarah we will need to discuss the website name. I believe the quickest option could be to edit the hyperlink display name in these references while keeping the underlying website name the same, would this be okay?

Hi, Amy. There are a few more things we still need you to amend. Please see the attached label file.

Thanks,

Sarah

Please find the attached labels with all the requested changes. All three registrants met this

morning and the attached documents provide our suggestions for the terms. I've included both the highlighted and clean version of the documents that were generated from our discussion. Syngenta would be amenable to further discussion with EPA regarding these comments as needed. Please don't hesitate to reach out with any questions.
